

17th International Symposium in Management

Reinventing Management in Turbulent Times

SIM's 17th edition will take place, as usual, in the lovely Romanian city of Timisoara. 2023 is a special year for Timisoara because it is one of the three European Capitals of Culture, so SIM will not only give participants the opportunity to attend quality sessions on management, but participants will also be able to enjoy a setting with various events related to the celebration of the European Capital of Culture.

The conference aims to bring together academics, professionals, and students in order to discuss the challenges that management deals with during economic crises. Our purpose is to address specific questions, such as the role of management in a rapidly-changing environment, the key management problems that must be addressed and solved using particular methods and techniques, while considering the threats and opportunities that appear in this dynamic period of time.

SCIENTIFIC ORGANIZERS

Politehnica University of Timisoara
West University of Timisoara
